Information about Copyrighted Content

Some instruments administered for studies archived with ICPSR may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE

WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

ICPSR PROCESSING NOTES FOR #38417

National Couples' Health and Time Study (NCHAT), United States, 2020-2021

DS 2: Restricted-Use NCHAT Main Respondent Survey Data

1. **Restricted-Use:** These data may not be used for any purpose other than statistical reporting and analysis. Use of these data to learn the identity of any person or establishment is strictly prohibited. To protect respondent privacy, certain files within this data collection are restricted from general dissemination. To obtain these files, researchers must agree to the terms and conditions of a Restricted Data Use Agreement in accordance with existing ICPSR servicing policies.
2. **Confidentiality/Disclosure Risk:** In order to protect respondent anonymity and prevent disclosure risk, ICPSR recoded many of the variables within the data. The disclosive information has been replaced with "MASKED BY ICPSR".
3. **Regarding Variable WEIGHT_COUPLE:** The variable **WEIGHT_COUPLE** is not needed or usable in this dataset without the NCHAT Partner Survey Data (DS5).
4. **Qualitative Data File:** The variable **DISCPREG1_5_TEXT** was exported to a comma delimited (CSV) file which is available for download and can be linked to the dataset via the **RESPONSEID** variable. The variable has been truncated to 244 characters in the data due to limitations and has been labeled "truncated by ICPSR".
5. **Newly Recoded "IDENTITY" Variables:** The Principal Investigators provided 11 new "**IDENTITY_#_R**" variables for data users to use. These are recoded versions of the original "**IDENTITY**" variables. Data users are free to utilize whichever version they so choose.
6. **Truncated Variable Label:** Due to statistical limitations, the variable label for variable **Q65** is truncated in the data. Please refer to the P.I. documentation for more information. The full variable label is:

In the past 30 days have you used antidepressant medication, such as citalopram (Celexa), escitalopram (Lexapro), fluoxetine (Prozac), fluvoxamine (Luvox), paroxetine (Paxil), sertraline (Zoloft), bupropion (Wellbutrin), vilazodone (Viibryd), vortioxetine (Brintellix), or amitriptyline (Elavil)?

7. **Truncated Value Labels:** Due to statistical limitations, the value label for value 5 in variables **HISP**, **HHR8_2**, **HHR8_3**, and **HHR8_4** is truncated in the data. Please see the P.I. documentation for more information. The full value label is:

Yes, another Hispanic, Latino/a/x, or Spanish origin (SPECIFY: Enter origin, for example, Argentinean, Colombian, Dominican, Nicaraguan, Salvadorian, Spaniard, and so on)

8. **Additional Information:** For additional information on the National Couples' Health and Time Study (NCHAT), please visit the [National Couples' Health and Time Study \(NCHAT\)](#) website.

Variable Description

Summary statistics (minimum, maximum, arithmetic mean, median, mode, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.

Restricted-Use NCHAT Main Respondent Survey Data

RESPONSEID: Unique ID - different for each survey record

Based upon 3,642 valid cases out of 3,642 total cases.

Location: 1-17 (width: 17; decimal: 0)

Variable Type: character

RESP_TYPE: Respondent type - primary or partner

Based upon 3,642 valid cases out of 3,642 total cases.
